Indoor Skydiving wins contract for Warsaw, Poland

Gladbeck, 27. July 2012. Indoor Skydiving Germany GmbH (ISG), German manufacturer of high performance freefall simulators, wins contract for the supply of a 14ft vertical windtunnel to Warsaw, Poland. ISG develops, manufactures and supplies vertical windtunnels for professionals and the entertainment industry.

ISG is proud to announce the attractive Polish project. German technology will henceforth fulfill flight enthusiasts the dream of flying weather and season independent.

Skydiving is very popular in Poland. The vertical windtunnel "Made in Germany" will complement local training opportunities and provide for weather independent practice. At the same time, the project is dedicated to sports- and entertainment enthusiasts starting at the age of four and will offer a novel and unforgettable fun mix of adrenaline and adventure in a secure environment.

The vertical windtunnel technology was developed in cooperation with the aerospace center of the Technische Universität Berlin in Germany and convinces by energy efficiency, safety and design on international level. The first reference facility opened in 2009 in Bottrop, Germany (Indoor Skydiving Bottrop GmbH - www.indoor-skydiving.com).

About Indoor Skydiving Germany GmbH:

Driven by the mankind dream of flying, Indoor Skydiving Germany develops, manufactures and supplies vertical windtunnels for professionals and the entertainment industry.
